SKILLS

- **Languages:** Python, C++, Java, C, JavaScript, HTML, CSS
- **Frameworks & Libraries:** Pandas, Numpy, Matplotlib, scikit-learn, seaborn, Scipy
- **Tools/Platforms:** Power BI, MS Excel, Jupyter Notebook, Linux, VS Code, Git, GitHub
- **Core CS Fundamentals:** DBMS, OS, SQL, OOP Concepts, Data Structures & Algorithms
- **Soft Skills:** Problem-Solving Skills, Team Player, Adaptability

PROJECTS

Global Health & Demographic Insights- Dashboard | [Link](#) Dec'2025

- Designed and developed an interactive Power BI dashboard analyzing global health and demographic data to identify country-wise trends and performance metrics.
- Performed data transformation and modeling using Power Query and established relational data models for accurate reporting.
- Designed interactive Power BI dashboard analyzing 10,000+ records, enabling real-time country-level trend analysis and KPI monitoring. to enable real-time analytical insights. Utilized DAX measures to compute aggregated metrics and analyze time-based trends across regions.

Tech stack: Power BI reporting, Custom Visuals, DAX, Power BI, KPIs.

Second-Hand Car Price Prediction – Machine Learning | [Link](#) Dec'2025

- Designed and implemented a production-ready Machine Learning system to predict used car prices and segment market value using Regression, Classification, Clustering, and PCA.
- Achieved 89% R^2 score on price prediction after feature engineering with statistical prediction intervals, KNN, Decision Tree, and Multinomial Naive Bayes for price estimation and transmission/fuel classification.
- Performed data cleaning, null value imputation, feature scaling, and model evaluation using accuracy metrics and confusion matrices, supported by data visualization.

Tech stack: Python, Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn

Food Imports Prediction Model-Dashboard | [Link](#) Apr'2025

- To analyze global food import data and understand how different countries contribute to total import values.
- Worked with an Excel dataset containing country-wise food import values and performed data cleaning, formatting, and verification.
- Generated a clean and well-structured dataset showing the total food import values from countries such as Canada, Chile, China, and others.

Tech stack: Excel (Pivot Tables, Slicers, Charts)

TRAINING

Lovely Professional University | [Link](#)

A Guide to Data Structures and Algorithms Using C++

Jun'2025 – Jul'2025

- A strong foundation in C++ programming and understand how data structures and algorithms work in real-world problem-solving.
- Worked extensively with major data structures such as arrays, linked lists, stacks, queues, trees, graphs, hash tables, and heaps.
- Successfully built a strong command over C++ programming and the ability to implement major data structures and algorithms from scratch.

CERTIFICATES

- Gen AI Nasscom– FutureSkills Prime | [Link](#) Feb'2026
- JavaScript (Intermediate) - HackerRank | [Link](#) Feb'2026
- SQL (Advanced) - HackerRank | [Link](#) Feb'2026
- Computational Theory – Infosys Spring Board | [Link](#) Aug'2025
- Legacy Responsive Web Design V8 – FreeCodeCamp | [Link](#) Oct'2023

EXTRA CURRICULAR ACTIVITIES

- Secured 2nd place in School-Level Badminton Tournament. Aug'2019

EDUCATION

Lovely Professional University

Bachelor of Technology - Computer Science and Engineering; **CGPA: 7.07**

Punjab, India
Aug'2023 - Present

Narayana Group of Educational Institutions

Intermediate, MPC; **Percentage: 91.5%**

Vijayawada, Andhra Pradesh
Jul'2021 – Jun'2023

Narayana Group of Educational Institutions

Matriculation; **CGPA: 10.00**

Markapuram, Andhra Pradesh
Jun'2020 – Mar'2021
